

GQPMC Report

James Kyubin Kwon

1. Spectrophotometry vs. Photometry

Result Summary:

- For both runs, the initial scatter was $1e-4$, burn-in 200, N_{walker} 40. The performances did not significantly differ.
- For photometry chains, $igal$ 19, 33, 64 failed, and $igal$ 19, 33, 38, 42, 64 for spectrophotometry chains.
